

MD Hosne Al Walid Shaiket

Calgary, Alberta, Canada — +1 (368) 999-3555 — walid.iut06@gmail.com — [LinkedIn](#) — [Portfolio](#)

Professional Summary

Data Analytics Consultant with over six years of Canadian experience delivering enterprise analytics, business intelligence, data engineering, software development, and enterprise application support solutions across government, healthcare, energy, retail, and consulting environments. Experienced in designing scalable data platforms, developing ETL/ELT pipelines, building Power BI semantic models, and transforming complex datasets into actionable insights that support operational and strategic decision-making. Strong technical expertise in Microsoft Fabric, Azure, SQL, Power BI, Databricks, Snowflake, Python, Java, C#, .NET, React, Microsoft Power Platform, Git, ServiceNow, and SonarQube through enterprise analytics and current application support work at Ovintiv. Proven ability to collaborate with business stakeholders, lead technical initiatives, and deliver scalable, high-quality solutions using Agile methodologies.

Core Competencies

Data Analytics — Business Intelligence — Data Engineering — Enterprise Application Support — ETL/ELT — Power BI Semantic Models — SQL Development — Data Modeling — Microsoft Fabric — Azure Analytics — Databricks — Snowflake — Data Quality — Reporting Automation — Stakeholder Engagement — Agile / Scrum

Technical Skills

Programming Languages: SQL, Python, R, Java, C#, .NET, JavaScript, React, PL/SQL, T-SQL, Shiny
BI & Analytics: Power BI, DAX, Power Query (M), Tabular Editor, Power BI Report Builder, Tableau, SSRS, Spotfire

Cloud & Data Platforms: Microsoft Fabric, Azure Data Factory, Azure Synapse, Azure SQL Database, Azure Data Lake, Databricks, Snowflake, AWS

Development Tools: Azure DevOps, Git, Oracle APEX, ServiceNow, GitHub Copilot, Claude Code, ChatGPT

Professional Experience

1. CGI Inc., Canada

Consultant – Data Analytics & Visualization

February 2022 – Present

- Deliver enterprise analytics, business intelligence, application development, and cloud data engineering solutions for government, healthcare, energy, retail, and commercial organizations.
- Design scalable reporting solutions using Power BI, Microsoft Fabric, Azure, SQL, Snowflake, and other modern cloud analytics technologies.
- Build ETL/ELT pipelines, semantic data models, interactive dashboards, and automated reporting solutions that improve operational efficiency and business decision-making.
- Collaborate with business stakeholders, project managers, developers, and technical teams to translate business requirements into scalable analytics and software solutions.
- Develop, support, and continuously improve enterprise applications and analytics platforms throughout the software development lifecycle using Agile methodologies and modern DevOps practices.

Key Consulting Engagements (8)

Healthcare • Energy • Retail • Security • Public Sector

(i) Ovintiv Inc., Alberta — Application Support Developer

June 2025 – Present

- Develop, enhance, and maintain enterprise applications using C#, .NET, Java, React, SQL, Python, R, and Microsoft Power Platform.

- Investigate and resolve production issues through debugging, root-cause analysis, and application enhancements.
- Design Power Apps and Power Automate workflows to improve operational efficiency and automate business processes.
- Perform continuous code quality analysis using SonarQube to identify bugs, vulnerabilities, and maintainability issues.
- Collaborate with cross-functional teams to implement new functionality and improve application reliability.
- Support version control, deployment, and change management using Git and ServiceNow.

(ii) Calgary Energy Solution Development (enVision), Alberta — Oracle SQL/APEX Developer April 2025 – June 2025

- Replaced more than 50 legacy WebFOCUS reports with Oracle APEX interactive reports.
- Designed SQL queries and interactive reporting solutions to improve reporting efficiency and usability.
- Assisted business teams with report development, SQL optimization, and end-to-end Oracle APEX implementation.
- Collaborated with stakeholders to translate reporting requirements into scalable reporting solutions.

(iii) Ministry of Health (British Columbia) — Business Intelligence Developer September 2023 – March 2025

- Developed enterprise Power BI dashboards supporting the Provincial Attachment System (PAS).
- Designed data models and interactive reports to support operational and strategic healthcare decision-making.
- Collaborated with business stakeholders to gather reporting requirements and deliver scalable analytics solutions.
- Performed data validation and quality assurance to ensure accurate and reliable reporting.

(iv) Ministry of Health (British Columbia) — Data Developer March 2023 – September 2023

- Developed customized healthcare data ingestion solutions to improve data collection accuracy.
- Built ETL and transformation logic using JavaScript and JSON Logic.
- Developed Power BI reporting solutions supporting healthcare operational reporting.
- Participated in collaborative software development using Git-based workflows.

(v) Ovintiv Inc., Alberta — Business Intelligence Developer July 2022 – February 2023

- Converted legacy Business Objects reports into modern Power BI reporting solutions.
- Designed Power BI semantic models, dashboards, and paginated reports using Oracle and SQL Server data.
- Applied data modeling and visualization best practices to improve reporting performance and user experience.
- Worked closely with business users to deliver enterprise reporting solutions supporting operational analytics.

(vi) Paladin Security Group Ltd. — Data Engineer June 2022 – August 2022

- Designed cloud-based data pipelines to migrate on-premises data into Azure analytics environments.
- Developed automated testing frameworks to improve data quality and validation processes.
- Integrated GitHub with Azure DevOps to strengthen version control and deployment practices.
- Collaborated with technical teams to enhance cloud data architecture and delivery processes.

(vii) Lululemon Athletica Canada Inc. — Data Engineer May 2022 – July 2022

- Gathered business and technical requirements for enterprise cloud migration initiatives.
- Designed Oracle-to-Snowflake migration architecture, including data transformation and validation processes.
- Proposed scalable cloud data solutions supporting enterprise analytics initiatives.
- Collaborated with engineering teams using Agile development methodologies.

(viii) Ministry of Health (British Columbia) — Data Analyst February 2022 – May 2022

- Analyzed healthcare reporting requirements and identified opportunities to improve business intelligence capabilities.
 - Created data flow diagrams and proposed ETL solutions supporting healthcare analytics.
 - Designed reporting concepts that improved operational reporting and evidence-based decision-making.
-

2. Ministry of Health, Government of British Columbia

Business Intelligence Developer

June 2020 – February 2022

- Designed and maintained enterprise ETL pipelines supporting provincial healthcare analytics.
 - Developed Power BI dashboards and interactive reports using SQL, DAX, and Power Query.
 - Built tabular models and OLAP solutions supporting analytical reporting.
 - Performed healthcare data analysis, cleansing, validation, and quality assurance using SQL, Python, and R.
 - Partnered with healthcare stakeholders to gather business requirements and deliver reporting solutions.
 - Supported provincial reporting initiatives including COVID-19 reporting, vaccination analytics, emergency department performance, surgical wait times, mental health services, patient experience measurement, and national healthcare expenditure reporting.
-

3. Academic Experience

Ahsanullah University of Science and Technology, Dhaka, Bangladesh *April 2016 – August 2019*

Assistant Professor, Department of Computer Science and Engineering

- Delivered undergraduate Computer Science courses covering programming, software engineering, databases, computer networks, algorithms, and digital image processing.
- Supervised student research projects and guided academic development in software and data-related subjects.
- Contributed to curriculum delivery, laboratory instruction, and student mentoring.

Ahsanullah University of Science and Technology, Dhaka, Bangladesh *October 2012 – April 2016*

Lecturer, Department of Computer Science and Engineering

- Delivered undergraduate courses in programming, database systems, software engineering, and computer science fundamentals.
- Supervised assignments, laboratory sessions, and student projects.
- Supported academic planning and classroom delivery across multiple course offerings.

Primeasia University, Dhaka, Bangladesh

May 2011 – September 2012

Lecturer, Department of Computer Science and Engineering

- Taught undergraduate Computer Science courses and laboratory sessions.

- Assisted with student advising, coursework evaluation, and academic support.
- Contributed to teaching delivery in programming and systems-related subjects.

Education

University of Manitoba

Master of Science (M.Sc.) in Computer Science

Specialization: Data Science, Business Intelligence, and Healthcare Analytics

Winnipeg, Canada

September 2019 – December 2021

Islamic University of Technology (IUT)

Bachelor of Science (B.Sc.) in Computer Science

Specialization: Digital Image Processing and Machine Learning

Gazipur, Bangladesh

December 2006 – November 2010

Professional Training

Cloud data warehousing technologies (e.g., Snowflake), Advanced Analytics Using Snowflake, Azure Data Fundamentals, Data Engineering on Azure Data Lake Storage, AWS Solutions Architect Associate 2022, Techniques for Big Data Analytics, Predictive Analytics, Azure Data Fundamentals: Data Analytics, Introduction to end-to-end analytics using Microsoft Fabric.

Awards and Scholarships

University of Manitoba Graduate Fellowship (UMGF); International Graduate Student Entrance Scholarship (IGSES); NSERC CREATE (VADA) Fellowship; OIC merit scholarship; Dhaka Education Board merit scholarship.

Academic Research Projects

COVID-19 disease tracking; in-situation 3D data visualization using a smart wearable ring; chronic kidney disease classification from real-life clinical data; visualizing association rules from COVID-19 datasets; custom selectable text widget for controlled text selection in mobile devices.

Publications

- 8 peer-reviewed journal publications
- 2 international conference proceedings
- Complete publication list available on Google Scholar and Personal Website
