PROFILE SUMMARY

- Data Analytics Consultant at [CGI Inc.](#) with a Master of Science (M.Sc.) degree in Computer Science from the University of Manitoba, Canada.
- Industry/Government experience in Data Analytics, Data Engineering, Business Intelligence, and Application Development.
- Knowledge of ETL/ELT, Data ingestion/transformation, building/optimizing data pipeline using Azure technologies (Data Factory, Databricks, Microsoft Fabric, Data lake and Synapse Analytics); Cloud data warehousing using Snowflake, Azure Synapse, design of cloud-based data solutions using Azure and AWS; Data visualization using Power BI and Tableau; Development and maintenance of applications in R, Shiny, Python, Java, and .NET.
- Experience in system analysis, application development, and implementation using popular methodologies like AGILE and SCRUM; Good understanding of the Software Development Life-cycle (SDLC).
- Good communication, presentation and organizational skills with proven experience in effective relationship building with clients, stakeholders and other business consumers.

SKILLS

- **Programming Languages:** C-sharp, .NET, Data Analysis eXpressions (DAX), Power Query (M), Java, JavaScript, Python, R, Shiny, React, PL/SQL, T-SQL.
- **Tools:** Azure DevOps, Oracle APEX, Power BI, Power BI Report Builder, Tableau, R-studio, SSRS, Spotfire.
- **Platforms:** AWS, Azure Cloud, Azure Synapse, Azure Data Factory, Azure SQL DB, Databricks, Snowflake, Microsoft Fabric, Microsoft Power Platform, ServiceNow.

PROFESSIONAL EXPERIENCE

- **Consultant - Data Analytics and Visualization** (February 2022 – Present)
[CGI Inc., Canada.](#)
Analytics and Emerging Digital Technologies Team.

Job description: Using visualization and UX best practices in different situations along with developing reporting and visualization solutions utilizing Power BI, Tableau, Looker, QlikView, and other modern BI solutions; using advanced visualization features within Power BI: Power BI Embedded Analytics, composite models, Apps, Dashboards, Reports, and Tiles; Using Relational Database Management System (RDMS) and equivalent in a modern cloud environment, Azure Synapse, Snowflake, RedShift, and Oracle Cloud; consuming advanced analytic models and ML model services into Power BI Visualizations; Using DevOps, CI/CD environment with technologies and platforms like Git, Jenkins, and Docker/Kubernetes.

Selected projects with CGI Inc., Canada (February 2022 to Present):

1. **Application Support Developer at Ovintiv Inc., Alberta, Canada** - As an application support developer, Walid is responsible for maintain and building new applications using Microsoft Power Platform (Power App, Power Automate), fixing bugs and building new features for applications developed in R, Python, Java, React, C-sharp, and .NET.

Also, Walid is responsible for continuous inspection of code quality, designed to automatically review and analyze code for bugs, vulnerabilities, and code smells using SonarQube. (Jun 2025 to Present).

Tools and Platforms: MS Power Platform (Power App, Power Automate), SQL, R, Python, Java, React, C-sharp, .NET, Oracle, Azure SQL, Git, ServiceNow, and SonarQube.

2. **Oracle SQL/APEX Developer at Calgary Energy Solution Development (en-Vision), Alberta, Canada** - As an Oracle SQL/APEX Developer, Walid Developed interactive reports using Oracle APEX for the Calgary energy solution development team, replacing over 50 WebFOCUS reports. Assisted the team in writing SQL for APEX reports and handling end-to-end interactive report development. (Apr 2025 to Jun 2025).
Tools and Platforms: SQL, Oracle, APEX, ChatGPT, Git.
3. **Business Intelligence Developer at Ministry of Health (B.C.), Canada** - As a Business Intelligence Developer, Walid developed a data analytics solution using the Provincial Attachment System (PAS) data to manage patient-doctor attachment requests (Sep 2023 to Mar 2025).
Tools and Platforms: SQL, Power BI.
4. **Data Developer at Ministry of Health (B.C.), Canada** - As a Data Developer, Walid developed a customized data ingestion tool using the CHEFS platform to enhance data collection accuracy. Responsibilities included ETL scripting, collaborative development using GitHub, and developing Power BI reports using CHEFS data. (Mar 2023 to Sep 2023).
Tools and Platforms: JavaScript, JSON Logic, Power BI.
5. **Business Intelligence Developer at Ovintiv Inc., Alberta, Canada** - As a Business Intelligence Developer, Walid converted Business Objects to Business Intelligence Reports to support various analytics projects. Utilized data modeling and visualization best practices to build Power BI and paginated reports from an on-premises Oracle/MS SQL database. (July 2022 to Feb 2023).
Tools and Platforms: Power BI, Power BI report builder, SSRS, Spotfire, Microsoft Power Automate.
6. **Data Engineer at Paladin Security Group Ltd., Canada** - As a Data Engineer, Walid was responsible for building a data pipeline to transition the on-premises data to cloud environment to support their analytics projects. He also developed the test automation framework to support the data quality process. Walid worked with the integration of GitHub with Azure DevOps to provide a version control capability of their automated testing scripts. (June 2022 to Aug 2022).
Tools and Platforms: Azure Cloud, Azure Data Lake, Azure Synapse, Azure DevOps.
7. **Data Engineer at Lululemon Athletica Canada Inc.** - As a Data Engineer, Walid gathered data requirements for a cloud-based data solution, migrating all data from the current Enterprise Landing Area (ELA) in Oracle to Snowflake. Proposed a pipeline for data transformation, validation, and an overall cloud-based solution using Snowflake (May 2022 to July 2022).
Tools and Platforms: Azure Cloud, Snowflake, Apache Airflow, Informatica, Jenkins.
8. **Data Analyst at Ministry of Health (B.C.), Canada** - As a Data Analyst, Walid identified data requirements and gaps, created data flow diagrams, and proposed an ETL/Ingestion tool for data transformation and validation. Proposed a solution to leverage Business Intelligence (BI) technology for automatic analysis and reporting (Feb 2022 to May 2022).
Tools and Platforms: MS Visio, SQL, SSMS, and Power BI.

Please visit my [Personal Website](#) to get the details.

- **Business Intelligence Developer (June 2020 – February 2022) - 1 year 9 months.**
Ministry of Health, Govt. of British Columbia, Victoria, BC, Canada.
Health Sector Information, Analysis and Reporting Division (HSIAR).

Job description: Walid was responsible for building ETL pipelines; scripting in R and Python for data cleaning and validation; preparing business requirements for the stakeholders and end users; data modeling; data analysis and visualization in Power BI; building the tabular model for analysis services; designing OLAP cubes.

Selected data analytics projects with the Government of British Columbia, Canada (June 2020 to February 2022):

Daily reporting on COVID-19 cases throughout the province; Daily monitoring of COVID-19 sites; COVID-19 registration, appointment, and vaccination coverage; Analysis of patient experience in emergency departments; Analysis of surgical wait times data; Analysis of mental health and substance use services data; Analysis of patient-centered measurement data; Analysis of national health expenditures data; Analysis of virtual care physicians data.

Development Tools and Languages: SQL, DAX, Power Query (M), R, Power BI, Visual Studio, Tabular Editor, and SQL Server Management Studio.

Please visit my [Personal Website](#) to get the details.

- **Assistant Professor (April 2016 – August 2019) - 3 years 4 months.**
Ahsanullah University of Science and Technology, Dhaka, Bangladesh.
Department of Computer Science and Engineering.
- **Lecturer (October 2012 – April 2016) - 03 years 06 months.**
Ahsanullah University of Science and Technology, Dhaka, Bangladesh.
Department of Computer Science and Engineering.
- **Lecturer (May 2011 – September 2012) - 01 year 04 months.**
Primeasia University, Dhaka, Bangladesh.
Department of Computer Science and Engineering.

TRAINING AND CERTIFICATIONS

Below are the selected topics covered in online training and courses:

Cloud data warehousing technologies (e.g., Snowflake), Advanced Analytics Using Snowflake, Azure Data Fundamentals, Data Engineering on Azure Data Lake Storage, AWS Solutions Architect Associate 2022: Compute and Data Analysis Services, Techniques for Big Data Analytics, Predictive Analytics, Azure Data Fundamentals: Data Analytics, Introduction to end-to-end analytics using Microsoft Fabric, etc.

Please visit my [LinkedIn Profile](#) or [Personal Website](#) to get the full list of online training and courses I have done on data engineering, data analytics, and data visualization.

EDUCATION

- **Master of Science (M.Sc.) in Computer Science (Sep 2019 to Dec 2021)**
University of Manitoba, Winnipeg, Canada (CGPA 4.2 out of 4.5)
Specialization: **Data Science, Business Intelligence, and Healthcare Analytics.**
[M.Sc. thesis link](#)
- **Bachelor of Science (B.Sc.) in Computer Science (Dec 2006 to Nov 2010)**
Islamic University of Technology (IUT), Dhaka. Bangladesh (CGPA 3.89 out of 4.0)
Specialization: **Digital Image Processing, Machine Learning.**

AWARDS AND SCHOLARSHIPS

- University of Manitoba Graduate Fellowship (UMGF), 2019-2021.
- International Graduate Student Entrance Scholarship (IGSES), University of Manitoba, 2019.
- NSERC CREATE ([VADA](#)) Fellowship for educational purposes, 2019-2020.
- Organization of Islamic Cooperation (OIC) merit scholarship during undergraduate studies, 2007-2010.
- Dhaka Education Board merit scholarship based on Higher Secondary Certificate (HSC) exam result, 2006.

ACADEMIC RESEARCH PROJECTS:

Selected projects during my master's study at the University of Manitoba:

- COVID-19 disease tracking.
- In-situation 3D data visualization and interaction using a smart wearable ring.
- Chronic kidney disease classification from real-life clinical data.
- Visualizing interesting association rules from COVID-19 data sets.
- Custom selectable text widget for controlled text selection in mobile device.

Please visit my [Personal Website](#) for more details.
